USDA/NRCS Soil Health Rainfall Simulator

The Rainfall Simulator provides a “seeing is believing” demonstration of how practices such as no-till farming, cover crops and prescribed grazing benefit soil health and improve the water cycle on cropland and pastures across the state. No-till cropland and pastures managed with prescribed grazing increase infiltration and reduce runoff and sedimentation. This demonstration includes discussion of topics such as infiltration, aggregate stability, soil structure and the relationship of these properties to runoff, erosion and water quantity.
